1. Sprint Planning Meeting

Date: Day 1 of Sprint 1

Attendees: Developer, Product Owner, Scrum Master

Duration: 45 mins

🥅 Goals

- Define sprint scope
- Break down CRUD user stories
- Estimate story points
- Finalize Sprint Backlog

🗣️ Disussion topics : presenter- Paryapti Macwan

1. Product Owner explained the core requirement:

   "We need basic inventory operations working first."

2. CRUD features were prioritized as **Must Have** for Sprint 1.

3. Technical approach selected:
   - Create model → repository → service structure
   - Use InMemory repository for Sprint 1
   - Write unit tests following TDD

4. Story point estimation done using **Planning Poker**.

🔢 Decisions

- Sprint Goal finalized: *Deliver working CRUD operations with unit tests.*
- Stories selected for Sprint 1:
  - Add product

- Update product
    - Delete product
    - View all products
- Acceptance criteria and tasks documented in backlog.
